ABOUT ME

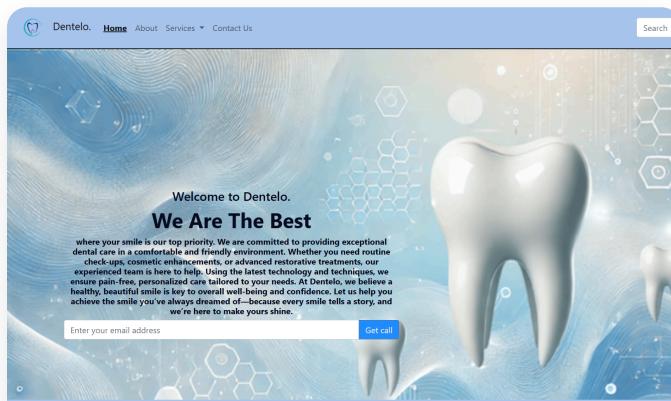

Hi, I'm Tilak Dalai, a passionate and creative web developer who enjoys building sleek, functional, and user-friendly websites. I love working on real-world projects that challenge me to grow and think differently. With a strong foundation in HTML, CSS, JavaScript, and frameworks like React and Flask, I focus on writing clean code and creating responsive designs that work across devices. I'm always open to learning new technologies, collaborating on exciting ideas, and turning concepts into reality through code. When I'm not coding, you'll find me exploring design trends, watching anime, or improving my skills one project at a time.
